Professional Summary

Dedicated and results-driven DevOps professional with 5+ years of hands-on experience

in optimizing and streamlining IT operations. Seeking a challenging role to leverage expertise in DevOps technologies and cloud infrastructure to contribute to a dynamic team.

Professional Experience

HCL TECH, Noida — Linux and Cloud Engineer

Mar 2022 – PRESENT

- Streamlined the CI/CD pipeline for Java-based applications using Jenkins, resulting in a 20% reduction in build and deployment times.
- Deployed apps in Kubernetes cluster and provided a strong support on pods/ networking and replica sets.
- Hands on experience in containerization of microservices architecture where I have containerized services of 3 development teams.
- Implemented infrastructure as code for EKS cluster on AWS.
- Strong experience in GCP/AWS clouds networking such as VPC, Load Balancing, Compute and IAM.
- Using version control as Git, improving code collaboration and traceability. Helped teams with branching strategy and webhook configuration.
- Helped in educating the junior engineers or other development teams in onboarding by performing proof of concept.

- Resolved critical production incidents promptly, maintaining system availability and minimizing business impact.
- Helped developers to write their Docker files to download their dependencies via image and upload them to the container registry.
- Experience in handling more than 3000+ servers remotely located Norway, Chennai based on hardware, virtual and cloud.
- Strong experience in providing uptime/patching/ troubleshooting/ rca support for Linux based servers.
- Created ansible playbooks and integrated them to use for repetitive tasks.
- Familiarity with scripting languages such as **Shell, Python**
- Monitoring system/application logs via Prometheus/Grafana/Datadog.
